PDQ'S LASERWASH 360 PLUS TOUCH-FREE IN-BAY AUTOMATIC VEHICLE WASH SYSTEM

With more than 10,000 LaserWashes shipped worldwide, PDQ Manufacturing, Inc., takes great pride in being the leader in the in-bay automatic vehicle wash industry. We are dedicated to providing wash operators with the most innovative equipment that exemplifies our tradition of Performance, Dependability and Quality. The LaserWash 360 Plus raises the standard again with new revenue-enhancement features and total cost-of-ownership improvements that offers wash operators the opportunity to realize the industry's highest return on investment.

THE PDQ advantage

- Open Bay Configuration
- Remote Monitoring and Configuration
- Exceptional Cleaning
- Low Maintenance Costs
- Energy-Efficient Design
- Low Water and Chemical Consumption
- Exceptional Local Distributor Support
- 24/7 Technical Service Support
- Customer Friendly Virtual Treadle

PLUS

- *Aircraft grade anodized aluminum bridge and main rails - Now Standard*
- *Non-corrosive materials used - stainless and aluminum*
- *Stainless steel pump station design focused on improved functionality and low maintenance costs*
- *Ultimate cover package - Now Standard*
- *Welded manifolds replacing assemblies of fittings-reduces leak points*

Vehicle Positioning

One of PDQ's most recognizable innovations is the unparalleled Virtual Treadle. This electronic vehicle-sensing technology eliminates drive-on floor-mounted mechanisms, creating a wide open and inviting bay for your customers. Ultrasonic sensors accurately measure the vehicle's width, and bridge sensors signal the driver to stop or back up by activating easy to understand audible LED signs. The wash system is then activated with an electronic safety envelope surrounding the entire vehicle, allowing the LaserWash 360 Plus to maintain an optimum cleaning distance whether the vehicle is parked to one side or angled in the wash bay.

Smart 360 Arch Control

The ultra-sophisticated LaserWash 360 Plus Arch Control System drives quicker throughput and amazes customers with its precise movements throughout the entire wash process. The Automatic Obstacle Guidance System uses advanced technology to locate obstacles such as trailer hitches, side mirrors and other obstacles that may restrict the wash arch from properly traveling around the perimeter of the vehicle. The arch will move away from the obstacle, record the position of the obstacle to avoid it on subsequent passes and continue washing the vehicle. If the wash arch cannot avoid an obstacle it will attempt to fully retract, rinse off any solution using the overhead rinse arch and prompt the customer to exit the bay. After the vehicle has exited and the bay is clear, the machine will automatically reset in preparation for the next vehicle.

PDQ's exclusively designed spray arch focus' on addressing the body style changes of today's more modern vehicles. A longer top manifold will clean wider vehicles, while a new side arch improves focus on harder to reach areas, such as under spoilers off the rear windows. In addition to the performance benefits, this new spray arch has a more modern appearance that your customers will love.

Front Bug Prep System

PDQ's exclusive Front Bug Prep can increase revenue without adding time to the wash process. Customers love this feature, which focuses on hard-to-clean areas like the windshield, back sides of mirrors and the front of vehicles.

3X Color Foam System

Upsell with this colorful feature! The 3X Color Foam Applicator can apply three-color foam solutions to the vehicle. Your customers, and your customer's children, will watch this product with awe as it covers their vehicle in a rainbow of colors.

OverGlow Hi-Gloss Application System

The OverGlow Hi-Gloss Application System drapes the vehicle in a thick sheet of cleaning solution with strategically placed bright LED lights further enhancing the customer experience while ensuring performance.

Super Sealant System

Protect the surface of the vehicle with our Super Sealant System. This option protects the clear coat and helps maintain the shine of your customers' vehicles, as well as being an excellent revenue generator.

Redesigned Pump Station

The redesigned HP Pump Station offers added durability along with an increase in ease of serviceability. The all stainless steel frame houses a dedicated fluid manifold designed to reduce fitting connections and reduce leak points. The chemical injection manifold has also been positioned for easy service access as well as increased durability.

High-Pressure Side Cleaners/Gatling Guns

Differentiate yourself from competitors with High-Pressure Tower Side Blasters or Gatling Guns. Both offer enhanced cleaning capabilities for the wheel, tire and rocker-panel areas. Designed to work in conjunction with underbody service lines, these high-pressure components are powerful cleaning tools.

SUPERIOR CUSTOMER EXPERIENCE

Web-Based LaserWash 360 Plus Interface Software*

Standard with every LaserWash 360 Plus is an advanced browser-based wash-control system that provides access to all key operating functions without the need for additional software. Through the password-protected software you can program wash packages and machine functions, monitor sales activity, obtain real-time wash data and eliminate unnecessary wash site visits. The LaserWash 360 Plus can also be programed to automatically send alerts to your computer, tablet, or smartphone, providing an instantaneous status of your wash activities and informing you of critical issues that may be occurring at your wash locations. This easy-to-program capability keeps you in touch with all of your sites from anywhere, at any time.

**Always make sure the proper security measures are used and firewalls are in place.*

Installation Flexibility

The LaserWash 360 Plus mounting system provides the flexibility to fit into a wide variety of wash-bay configurations. The LaserWash 360 Plus can be installed as a Free-Standing Frame or a Wall-Mounted machine. The Wall-Mount System offers an open-bay feeling unlike any other machine in the industry, while the Free-Standing Frame can be used where the walls may not be structurally sufficient.

The main support rails can be adjusted during installation to accommodate various wash bay lengths. In addition, the Precision-Loading System allows longer vehicles to fit comfortably into shorter wash bays, essentially making your wash bay one foot longer.

Non-Corrosive Materials Used

All stainless steel and aluminum is used for excellent resistance to water and chemical corrosion and for its durability and lightweight properties. The shape of the anodized extruded aluminum rails in the bridges and trolley allows for an enclosed roller design, resulting in extremely low roller resistance and reduced power requirements...LESS power consumed = MORE \$\$\$ saved!!!

E-Chain

Driver or passenger side-mounted factory preloaded energy chain for easy and low cost installation

Roller Inside

Bridge and trolley movements are smooth and effortless using internally mounted dual-axis rollers. The hanging design allows self-centering and improves roller life by protecting the rollers from harsh wash environment

Speed= Increased Revenue

Simplified engineering and high-quality materials provide the optimal balance between initial investment and long-term profitability. Substantially faster wash speeds increase vehicle throughput, resulting in shorter wash lines that will please your customers and keep them coming back.

BayGlow Wash Bay Illumination System

A light show that is sure to impress all your customers near and far. BayGlow is an lighting attraction that displays multiple color combinations and patterns that are visible from the car in the wash bay, at the gas pump, and from the street. Seamlessly controlled by your LaserWash360 Plus, BayGlow will help drive customers to your wash and ultimately help drive revenues.

The Wide-Open, Exciting And Illuminated LaserWash 360 Plus

The LaserGlow Illumination System has two options that will delight your customers and allow you to differentiate your site from your competitors.

LaserGlow Bridge Illumination System

The brilliant LED lighting portals provide even greater assistance to your customers during the loading process and offers you the ability to program lighting sequences that enhance the overall wash experience for customers while they are in the wash bay.

LaserGlow Projection Illumination System

The projection illumination system uses engineered optical technology that combines light with the wash service on the surface of the vehicle, giving an incredible and memorable car wash experience.

Ultimate Cover Package

The LaserWash 360 Plus ultimate cover package is both attractive and functional. The standard ultimate cover package offers a complete state-of-the-art look that is sure to impress your customers. In addition to its looks, the cover package reduces machine exposure to the harsh wash bay environment. Underneath the covers, a separate enclosure for air valves has been added to the bridge, while all fluid valves have been removed, increasing overall reliability and serviceability.

Smart 360 Drying System

PDQ's LaserWash360 Plus integrated dryer option can be coupled with the unique *FlashDry* High-Volume Spot-Free Rinse service. FlashDry requires no additional time for a basic dry by completing the rinse and dry cycles in a single, simultaneous operation. Developed on the principal that it is easier to remove water that is already in motion, FlashDry technology simultaneously rinses and removes more than 80% of the water in a single 10-second pass. Additional dryer options include a MaxAir Stand-Alone Dryer, or the ability to use the integrated dryer as a drive-through service as the customer exits the wash bay. These options allow greater package differentiation, giving operators the ability to up-sell customers for increased revenue and profitability.

SwingAir Synchronized Motion Drying System

Your customers will enjoy drier vehicles with PDQ's SwingAir Synchronized Motion Drying System. The enhanced SwingAir oscillating feature improves dryer performance while still using less energy than most conventional dryers. This new system incorporates motion in the center two producers to help sweep water off of the vehicle's top surface, allowing the two outside producers to focus on pushing water down and off the sides of the vehicle. The SwingAir feature is available on both stand-alone and integrated drying systems.

LASERWASH 360 PLUS FEATURES

LaserWash 360 Plus Base Unit Includes:

- LaserWash 360 Plus
- Corrosion-Resistant Bridge & Trolley
- Smart 360 Technology (with: Smart Networking, Smart Dwell, Smart Arch Control, Smart Drying System and Smart Cleaning System)
- Automatic Obstacle Guidance
- SST Wall Mounts
- Aluminum Rails
- In-Bay Sign
- Pump Station Water Tank
- Virtual Treadle,
- Electrical Control Panels
- Basic LED
- General Pump
- Fully Loaded E-Chain & Bulkhead Manifold
- Ultimate Cover Package
- Advanced Arch Package

LaserWash 360 Plus Optional Items:

- CAT 3535 Pump
- Water Heater
- Single/Dual Pressure Fed Inlet
- Water Saver Package
- In-Bay Pump Station Covers
- 2 or 4 Nozzle Integrated Dryer
- MaxAir Stand Alone Dryer
- SwingAir Synchronized Motion Drying System
- LED Service Confirmation Sign
- LED Entrance Sign
- LaserGlow Bridge Illumination Effect System
- LaserGlow Projection Illumination Effect System
- High Pressure Undercarriage
- 3X Color Foam
- OverGlow Hi-Gloss Application System
- Booster Pump for Low Pressure Sites
- Dedicated Super Sealant Manifold
- Dedicated Front Bug Prep Manifold
- Rust Inhibitor
- Wheel Cleaner
- High Volume Rinse Arch
- Electric High Pressure Gatling Guns
- High Pressure Side Combo Blasters
- Free Standing Frame
- Spot Free Rinse Application
- Water Reclaim Systems
- Storage Tanks
- Wash Activation Entry Terminals
- Cortex Site Management Software
- WALs Loyalty Program

LaserWash 360 Plus Specifications:

*NOTE: Equipment dimension specifications do not take into consideration any obstructions, unusual wash bay configurations, etc. **Rails can be cut to length for shorter bays.*

BUILDING REQUIREMENTS

Height	Wall Mount	10'-6" Minimum (3.20m)
	Frame Mount	10'-8" (3.28m)
Width	Wall Mount	13'-6" Minimum to 18'-0" Maximum (4.11 to 5.49m)
	Frame Mount	13'-6" Minimum (w/o integrated dryer) (4.11m)
		14'-1" Minimum (w/integrated dryer) (4.28m)
Length	Wall Mount	28'-4" (full length rails)** (8.64m)
	Frame Mount	29'-7" (full length rails)** (9.02m)

UTILITY REQUIREMENTS

Air	1.5 SCFM @ 90 psi (6.21 Bar)
Water	30 GPM (114 lpm) @ 10 psi (0.69 Bar)
Electrical	3-Phase, 50/60 Hz

ELECTRICAL REQUIREMENTS

Voltage	Pump Station	Water Heater	Bridge	Dryer Power Feed #1	Dryer Power Feed #2
208/230	90/85 Amps	28/25 Amps	20 Amps	44/41 Amps	44/41 Amps
380	60 Amps	25 Amps	20 Amps	15 Amps	15 Amps
460	40 Amps	208/230V - 28/25 Amps	208/230V - 20 Amps	21 Amps	21 Amps
575	30 Amps	208/230V - 33/30 Amps	208/230V - 20 Amps	17 Amps	17 Amps

DRYING OPTIONS

30 HP Integrated 4 - Producer MaxAir Dryer	(208/230/380/460/575V 60Hz)	(220/380V 50Hz)	30 HP Integrated 4 - Producer MaxAir Dryer	(208/230/380/460/575V 60Hz)	(220/380V 50Hz)
15 HP Integrated 2 - Producer MaxAir Dryer	(208/230/380/460/575V 60Hz)	(220/380V 50Hz)	30 HP Integrated 6 - Producer MaxAir Dryer	(208/230/380/460/575V 60Hz)	(220/380V 50Hz)
